

# Stock Market Analytics Dashboard

## QQQ vs SPY ETF Performance Monitoring

### Market Day

15 May 2026

### Purpose

This dashboard provides an end-to-end analytical view of ETF market performance using **QQQ (Nasdaq-100 ETF)** and **SPY (S&P 500 ETF)**. It is designed to provide a consolidated view of ETF behavior by combining price trends, volatility analysis, momentum indicators, and trading activity into a single analytics interface.

The dashboard helps monitor **Price movement**, **Daily returns**, **Market volatility**, **Trading volume trends** and **Moving average momentum**.

### Performance

QQQ has decreased by 1.5% compared to the previous market day. Current volatility levels are moderate, indicating bullish market behaviour.

SPY has decreased by 1.2% compared to the previous market day. Volatility currently remains moderate, reflecting relatively bullish market sentiment.
